EDUCATION

SD Negeri Pepen

MTs Negeri 1 Kulon Progo

SMK Negeri 2 Pengasih
Computer and Network Engineering

CERTIFICATE

- Fundamentals of Artificial Intelligence
- Generative AI: Introduction & Ethics
- Applying AI for Productivity

ABOUT ME

I'm Mumtaz Kholafiyan Alfan, a tech-driven learner who enjoys building things on the web. I come from a Computer and Network Engineering background, and I naturally gravitate toward creating, experimenting, and improving myself through code and hands-on projects. I'm the type who learns independently, adapts quickly, and stays curious about new ideas and tools in the IT world.

SKILL

Technical Skills
- Server & Networking: Ubuntu Server, Mikrotik
- Web Development: HTML, CSS, PHP, SQL, GIt, React
- Basic System Troubleshooting

Non-Technical Skills
- Fast learner and highly adaptable
- Strong practical problem-solving skills
- Able to work independently or as part of a team

Language Proficiency
- Indonesian
- English

EXPERIENCE

1-Month Internship — Regional Development Planning Agency (BAPPEDA), Kulon Progo Regency
Worked as an intern supporting administrative and technical tasks within the regional planning office environment.

3-Month Internship — Faculty of Vocational Studies, Yogyakarta State University (UNY)
Assisted in IT-related activities and daily operational support within the vocational faculty.
